

Antibiotic Usage Declaration — 12 months to September 2026

M J Hunt & Son — Upper Assendon Farm, Stonor, Henley-on-Thames, Oxfordshire RG9 6HE

SBI 106227532 · CPH 33/227/0030

Document owner: James Hunt · Last reviewed: 24 September 2026 · Next review: September 2027

M J Hunt & Son sets out below the antibiotic (antimicrobial) usage record for the beef herd at Upper Assendon Farm for the 12 months to 24 September 2026. This is not a nil return: one course of antibiotic treatment was administered during the period, recorded below.

Treatment record — Calf 1919, 20–22 September 2026

On 20 September 2026, calf 1919 (approx. 250kg) appeared very poorly with a suspected infection. James Hunt administered Alamycin LA (oxytetracycline long-acting injectable), 25ml (1ml/10kg) by subcutaneous/intramuscular injection, together with Metacam 20mg/ml (meloxicam), 6.25ml (0.5mg/kg), under the farm's standing veterinary health plan, as the calf's condition had not improved. Batch numbers: Alamycin LA 5295-601AE (exp 18/07/2027); Metacam T21077-44 (exp 31/12/2027). Meat withdrawal applied: 28 days (standard label figure for Alamycin LA — to be confirmed against the current product datasheet before relying on the withdrawal date). No milk withdrawal applies (non-dairy beef herd).

On 22 September 2026, Adelle Jenkins (Larkmead Veterinary Group) attended as a follow-up visit after the calf had not improved: blood samples were taken to investigate the cause and the calf was given rehydration therapy (IV/oral fluids). No further antimicrobial was administered at this visit.

[Confirm with Larkmead Veterinary Group the prescription / standing health plan reference authorising the 20 September treatment, and file it alongside this declaration.]

Outside of this single course, no other antibiotics were administered to the herd in the 12-month period to 24 September 2026.

This record is provided in accordance with Red Tractor Beef & Lamb Standard AM.8.1, which requires that total annual antibiotic usage is collated and uploaded to the AHDB Medicine Hub (or an equivalent system).

[Submit this usage record via the AHDB Medicine Hub (medicinehub.co.uk) or equivalent system before the inspection — this is a non-nil return covering the calf 1919 treatment above — and keep the submission confirmation with this note.]
