

Emergency Contingency Plan

M J Hunt & Son — Upper Assendon Farm, Stonor, Henley-on-Thames, Oxfordshire RG9 6HE

SBI 106227532 · CPH 33/227/0030

Document owner: James Hunt · Last reviewed: 24 September 2026 · Next review: September 2027

This plan sets out how M J Hunt & Son will respond to serious incidents and emergencies affecting livestock welfare, food safety or the environment at Upper Assendon Farm. It is kept in the farm office and Farm Hub, and known to everyone working on the farm.

Person responsible

James Hunt holds primary responsibility for livestock and farm operations. If James Hunt is unavailable, Harry Costar (Farm Manager, 07920 181259) takes responsibility for immediate decisions and contacting the relevant people below.

Key contacts

Contact	Details
Emergency services (fire, ambulance, police)	999
Police — non-emergency	101
Vet — Larkmead Vet Group (office)	01491 651479
Vet — Bella (primary day-to-day contact)	07760 778081
Vet — Adelle Jenkins (nominated vet, signs Health Plan)	via Larkmead office above
Farm Manager — Harry Costar	07920 181259
Agronomist — Luke Cotton (independent)	07775 518268
Electricity supplier — Octopus Energy	0808 164 1088
Water — Castle Water (billing, a/c 2431265); Thames Water (network/emergency)	Thames Water emergency line: 0800 316 9800 (mains/network issues); Castle Water for billing queries
Farm insurer — NFU Mutual (policy NFU-UAF-2025)	01844 278755
Environment Agency — pollution incident hotline	0800 80 70 60 (24hr)
APHA / Defra Rural Services Helpline (notifiable disease, TB)	03000 200 301 (confirmed current, 24 Sep 2026)
Fallen stock collection — Passey	01635 40327 (contract reference still to be confirmed and filed in the Hub)

Fire

- Evacuate people and, where safe to do so, livestock. Call 999.

- Know the location of fire extinguishers, mains water and electricity isolation points. [confirm and note locations here]

Power cut

- Check any equipment critical to livestock welfare (feeders, water pumps, ventilation). Contact Octopus Energy for the farmhouse supply; check for a farm business supply fault separately if applicable.
- [Confirm whether a backup generator is available and where it is kept.]

Feed or water equipment failure

- Switch to manual feeding/watering arrangements immediately. Contact feed/water suppliers for urgent replacement parts or emergency water supply (tanker) if normal supply fails.

Flooding / extreme weather (drought, snow)

- Move livestock to higher ground or appropriate shelter as needed. Check stock more frequently in extreme conditions.

Disease outbreak (including notifiable disease)

- Isolate affected animals where possible and contact the nominated vet immediately.
- For notifiable disease suspicion, contact APHA / Defra Rural Services Helpline without delay.
- The herd is currently Officially Tuberculosis Free (OTF), last tested clear a couple of weeks ago — continue routine testing as directed by APHA/the nominated vet.

Pollution incident (slurry, fuel or chemical spillage/leak)

- Contain the spill if it is safe to do so and stop it reaching any drain, soakaway or neighbouring land. The farm itself has no watercourses or ditches on it (confirmed 24 Sep 2026).
- Call the Environment Agency incident hotline (0800 80 70 60) for any incident that has or could reach groundwater, a drain, or a watercourse on neighbouring land.

Activist activity

- Prioritise personal safety. Do not engage directly. Call 101 (or 999 if there is an immediate threat) and record what happened as soon as possible.

Plan accessibility

This plan is kept in the farm office and in the Farm Hub (Compliance section) and is discussed with all workers as part of induction and at least annually.
