### Notes

Standing contract: Advanced Pest Control (Daniel Andrews) — MONTHLY visits, all bait points on the farm checked and replenished as needed. Full monthly invoices/records held in the office paper file. Table below records confirmed visits as evidence is gathered.

Prior to using any toxic bait, non-chemical control methods should be considered first. Bait points should be checked regularly, replenishment dates recorded, and dead/trapped vermin removed at each check. Permanent baiting should not be routinely used.
